

Evaluate Support on a Single Computer Screen

Once case facts have been entered, a SINGLE ANALYSIS SCREEN is used to evaluate different alimony and child support alternatives. Change alimony and child support amounts and see after-tax cash impact on the settlement. Switch children under 17 at the top to see tax savings from dependency exemption and under age 17 child tax credit at the bottom. Once you have a case you want, store it in the Summary Report on Support. Change support amounts to structure a settlement that makes tax sense and gets the client to the share of AFTER-TAX CASH to meet living expenses which YOU WANT.

ALL KEY VARIABLES FOR SUPPORT DECISION ARE SHOWN ON THIS SCREEN

To get to this screen, choose: Support Analysis menu, Split Screen Summary Analysis.

Federal Income Tax	11,928	2,343	14,271	No Recapture	38,265	

This is last case of Support Summary exhibit. You can immediately see the after-tax impact of using more alimony on bottom line cash flow for both parties. Different mixes of alimony and child support can be easily assessed. You instantly see taxes saved from the child dependency exemption and underage 17 child tax credit. You can determine the tax savings from the child dependency exemption and child tax credit if either party claims the children. It's simple to figure out who should "take the kids" and detailed reports are available to show how the numbers on this screen are computed. All the federal tax tables are available on-screen to make this analysis simple.

FinPlan Divorce Planner's single screen analysis lets you quickly determine how to get your clients to the best possible settlement because you KNOW the TAX IMPACT of different options is accurate.
